

MITHUN KUMAR A

Business Analyst — Analytics & Fintech

Bangalore, India • +91-8778314234 • mithunk98.0229@gmail.com • [linkedin.com/in/mithunk98](#) • [Portfolio](#)

PROFESSIONAL SUMMARY

Business Analyst with 2.5 years of experience (including analytics internship at Titan Company Limited), reporting directly to the Chief Risk Officer at Vidyuttech. Automated 23+ critical reports using Python and SQL (reducing manual effort by 50%), built 15+ Metabase dashboards tracking portfolio health across DPD buckets, bounce rates, and collections performance. Designed roll-rate forecasting models improving credit risk forecast accuracy by 25%. Expert in collections analytics, portfolio risk management, and cross-functional stakeholder requirements translation. Currently pursuing M.Sc Data Science.

TECHNICAL SKILLS

Data & Analytics:	SQL (MySQL, PostgreSQL, MariaDB), Python (Pandas, NumPy, SQLAlchemy, openpyxl, xlswriter), ETL pipelines, Reporting automation
BI & Visualization:	Metabase (optional filters, pivots, dynamic variables), Advanced Excel (VBA, pivot tables, SUMPRODUCT, conditional formatting)
Fintech Domain:	Collections analytics (DPD, bounce rates, agency performance), Portfolio risk (LTV, NPA, vintage analysis, roll-rate modeling), Credit risk assessment
Tools & Methods:	AWS S3, Git, JIRA, Agile/Scrum, Postman API, Requirements gathering, Gap analysis

PROFESSIONAL EXPERIENCE

Business Analyst

May 2025 – Present

Vidyuttech Service Private Limited, Bangalore — Reporting directly to Chief Risk Officer

- Automated 23+ organizational reports using Python and SQL; designed ETL pipelines processing daily loan records across 10+ source tables with 99% accuracy, reducing weekly manual reporting effort by 50% (20 hrs → 10 hrs).
- Built and optimized 15+ Metabase dashboards tracking portfolio health metrics including DPD buckets, bounce rates, collections performance across 4 agencies, and field agent KPIs; reduced ad-hoc SQL requests by 40%.
- Designed predictive roll-rate models improving credit risk forecast accuracy by 25%; conducted advanced delinquency pattern analysis informing portfolio risk management decisions at CRO level.
- Led cross-functional requirements gathering with operations, collections, and product teams; delivered integrated analytics solutions aligned with business priorities across 3+ stakeholder groups.
- Owned post-launch dashboards: City-wise DPD Report (15+ cities, MoM trending), Collections Priority Pivot, Vintage Cohort Analysis (16-metric framework), Agency Performance Tracking (visit%, bounce%, ACM-level).

Business Analyst Trainee

Sep 2024 – Apr 2025

Vidyuttech Service Private Limited, Bangalore

- Developed 15+ operational dashboards tracking DPD buckets, bounce rates, and field agent performance across 3 loan products supporting cross-functional planning and risk assessment.
- Automated core reporting workflows eliminating 20+ hrs/week of manual effort; designed reusable SQL templates for LTV calculations, delinquency trends, and agency-wise collections rates.
- Participated in stakeholder requirements sessions to identify reporting gaps; proposed and implemented technical solutions aligned with operational and strategic priorities.

Data Analyst Intern

Dec 2023 – Jun 2024

Titan Company Limited, Bangalore

- Designed Excel dashboards for HR leadership tracking talent acquisition metrics (funnel analysis, offer acceptance rates, workforce planning) across 500+ employees; insights informed campus hiring strategy.
- Built PyQt6-based GUI application reducing manual employee data validation from 4 hrs/week to 30 minutes; enabled HR team to focus on strategic workforce initiatives.

EDUCATION

M.Sc Data Science (Pursuing, Expected 2027) — CHRIST University, Online

B.Tech Computer Science & Engineering with Data Science Specialization (2024) — CHRIST University • GPA: 3.6/4.0

CERTIFICATIONS

SQL for Data Science • Tableau Desktop Specialist Prep • Python Programming • HackerRank: SQL Advanced & ML Badges

KEY PROJECTS

- Cloud-Native E-commerce ML Pipeline** — AWS S3, Python, Scikit-Learn; end-to-end automated decision engine with NLP sentiment analysis and Random Forest predictions.
- Portfolio Audit Automation** — Multi-sheet Excel system (Python + openpyxl) tracking vehicle loan performance metrics across active/inactive/surrendered statuses with risk categorization.
- Financial Data Processing** — Hadoop MapReduce implementation reducing 4-hour analysis to 45 minutes (81% improvement).
